

# Cross-Product Master Agreement

February 16, 2000

“Managing counterparty risk across different financial product types and widely used industry master agreements is a goal that should be pursued to reduce financial system risk. The enclosed standardized Cross-Product Master Agreement provides one tool that may be useful towards achieving this goal. Market participants should take note of this initiative and consider using the Cross-Product Master Agreement where appropriate, keeping in mind that the requirements for netting may differ from jurisdiction to jurisdiction.”
